PROFILE

Aspiring Machine Learning Engineer with hands-on experience in building end-to-end machine learning pipelines using Python, Scikit-learn, and Streamlit. Developed predictive models for customer churn and medical diagnosis achieving up to 90% accuracy. Strong foundation in data analysis, feature engineering, and model evaluation, with a passion for solving real-world problems using data-driven approaches.

PROJECTS

DATA SCIENCE

1. **AI-Driven Customer Churn Prediction System**
   - Built an end-to-end ML pipeline on 10,000+ customer records to predict churn
   - Achieved ~90% accuracy using Logistic Regression and Random Forest
   - Performed EDA, feature engineering, and model evaluation (ROC-AUC, cross-validation)
   - Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib
   - Github : https://github.com/JawadSk12/ai-driven-customer-churn-prediction

2. **Cancer Diagnosis Using Machine Learning**
   - Developed ML models (Logistic Regression, Random Forest, SVM, KNN) for cancer classification
   - Applied preprocessing, feature engineering, and TF-IDF techniques
   - Built a Streamlit dashboard for real-time prediction visualization
   - Tools: Python, Pandas, Scikit-learn, Streamlit
   - Github : https://github.com/JawadSk12/CancerDiagnosis

ACHIEVEMENTS & ACTIVITIES

- Built multiple real-world Machine Learning projects
- Actively learning advanced AI and Deep Learning concepts
- Strong problem-solving and analytical thinking skills

EDUCATION

2023-2027
BACHELOR OF ENGINEERING (COMPUTER)
Vidyalankar Institute of Technology

2021-2023
SECONDARY SCHOOL
Gurukul College of Science Commerce and Arts

SKILLS

- **Machine Learning**: Regression, Classification, Random Forest, Decision Trees, SVM, Clustering
- **Deep Learning**: Neural Networks, CNNs (Basics), TensorFlow/Keras
- **Natural Language Processing (NLP)**:Text Preprocessing, Tokenization, Stopwords Removal, TF-IDF, Bag of Words, Word Embeddings, Sentiment Analysis, Text Classification, Spam Detection, Basic Transformers (BERT – Basics)
- **Data Science:** EDA, Data Cleaning,Data Analysis, Modeling, Predictive Analytics, Feature Engineering, Visualization (Matplotlib, Seaborn), Power BI
- **Programming**: Python, Pandas, NumPy, Scikit-learn, Jupyter, Git, GitHub
- **Databases:** SQL (PostgreSQL)
- **Model Evaluation & Optimization** Accuracy, Precision, Recall, F1-score, Confusion Matrix, Cross-validation
- **Platforms**: Jupyter,GitHub, Azure
